

PROJECT CASE STUDY

Smittys Westwood – Conference Room AV Installation February 2026

Westwood Village Inn – Smittys Westwood
477 Westwood Drive, Winnipeg, MB
Lower Level

Project Outline:

Design and install a state of the art AV Conference System to provide a live cable TV feed, Microsoft Teams meeting capabilities, remote computer connection and microphone input. Video to be displayed on several TV's located throughout the room. Audio to use the existing ceiling speakers.

Installed Hardware:

The following hardware was installed to meet the project requirements:

- 5 - Samsung 55" 4K UHD LED TV's - Wall mounted
- Custom built equipment rack with locking door
- CAT6 Network cable from matrix location to each TV
- 8x8 4K 60HZ HDMI Matrix Switcher
- Rogers 4K Cable Receiver
- HDMI external input c/w audio extractor
- ART MX821S Eight Channel Mic/Line Mixer with Stereo Outputs
- ART SLA1 100W Power Amplifier
- External XLR Microphone input

Project Notes:

- The AV system was designed to be easy to use by hotel staff and customers without requiring any technical support.
- All components were mounted in a custom rack enclosure embedded in the wall with a locking cover door.
- The system easily allows customers to play Rogers video content such as a sporting event or Stingray music, connect a laptop or tablet to the system for power point presentations or Teams meetings, and connect a microphone for presentations or speeches.

Please contact CCR Technology Group for more information or to request a consultation regarding your AV requirements.
