

PROJECT CASE STUDY

Smittys Lounge - AV System Upgrade March 2026

Selkirk Inn & Conference Centre
1162 Main Street, Selkirk, MB
Smittys Lounge

Project Outline:

Upgrade an aging component video matrix and outdated audio system to provide the lounge staff with an easy to control system that can broadcast multiple cable TV feeds and provide streaming audio to the lounge, VLT area and Smittys restaurant from one control interface.

Installed Hardware:

The following hardware was installed to meet the project requirements:

- WolfPack 4 x 16 - 4K 60HZ HDMI Matrix c/w HDMI over IP extenders to each of the 16 TV locations
- New CAT6 Network cable from matrix location to each TV
- 4 - Rogers 4K Cable Receivers
- TAP TV interactive trivia streamer
- Shure BLX24/PG58 UHF Wireless Microphone System
- Tascam MZ-223 Industrial-Grade Zone Mixer
- ART SLA1 100W Power Amplifier
- Reuse 3 existing power amps
- Custom Rogers receiver mounting rack

Project Notes:

- The AV system was designed to be easy to use by the lounge staff without requiring any technical support.
- All components were rack mounted
- The system allows the staff to play up to 3 sporting events or trivia game on any or all TV screens as well as game audio or a Stingray music feed.
- The system can also send separate music feeds to the VLT area and restaurant.

Please contact CCR Technology Group for more information or to request a consultation regarding your AV requirements.
